

1. What is HD-CCTV

- **What is HD-CCTV ?**

An HD-CCTV system is a video surveillance system wherein specialized surveillance features defined by official HDcctv alliance for CCTV market is used. ***Video(HDTV) signals are transmitted digitally over conventional CCTV media*** based on standard HD-SDI transmission technology.

- **Why HD-CCTV ?**

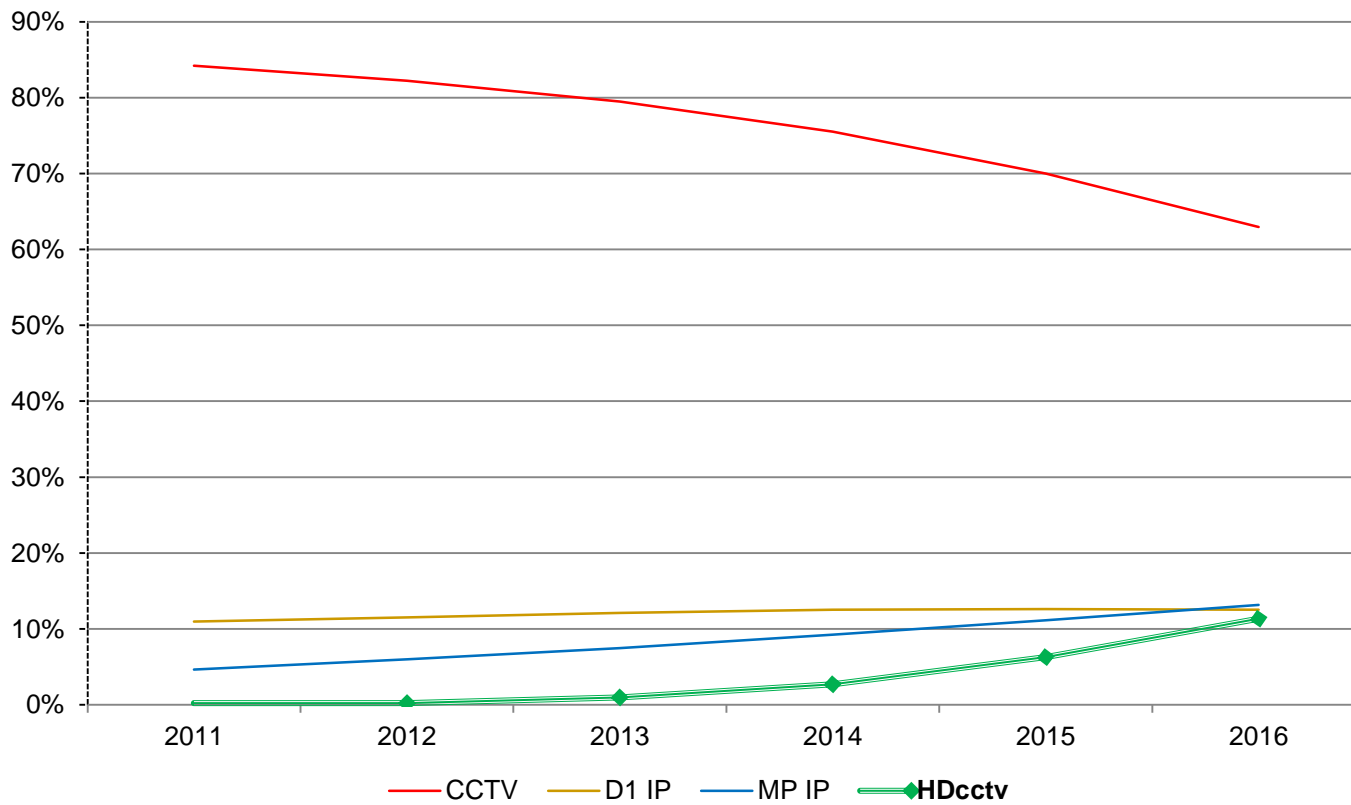

High-Definition is no more the terminology for IP solution.
The answer is HD-CCTV.

- **What is HD-SDI ?**

HD-SDI is short for HD-Serial Digital Interface that were derived from SDI foundational technologies which were developed for the professional HDTV market and widely deployed and defined to be world standard protocol. So the HD-SDI transmission will be only and best way to deliver HD quality image without any loss.

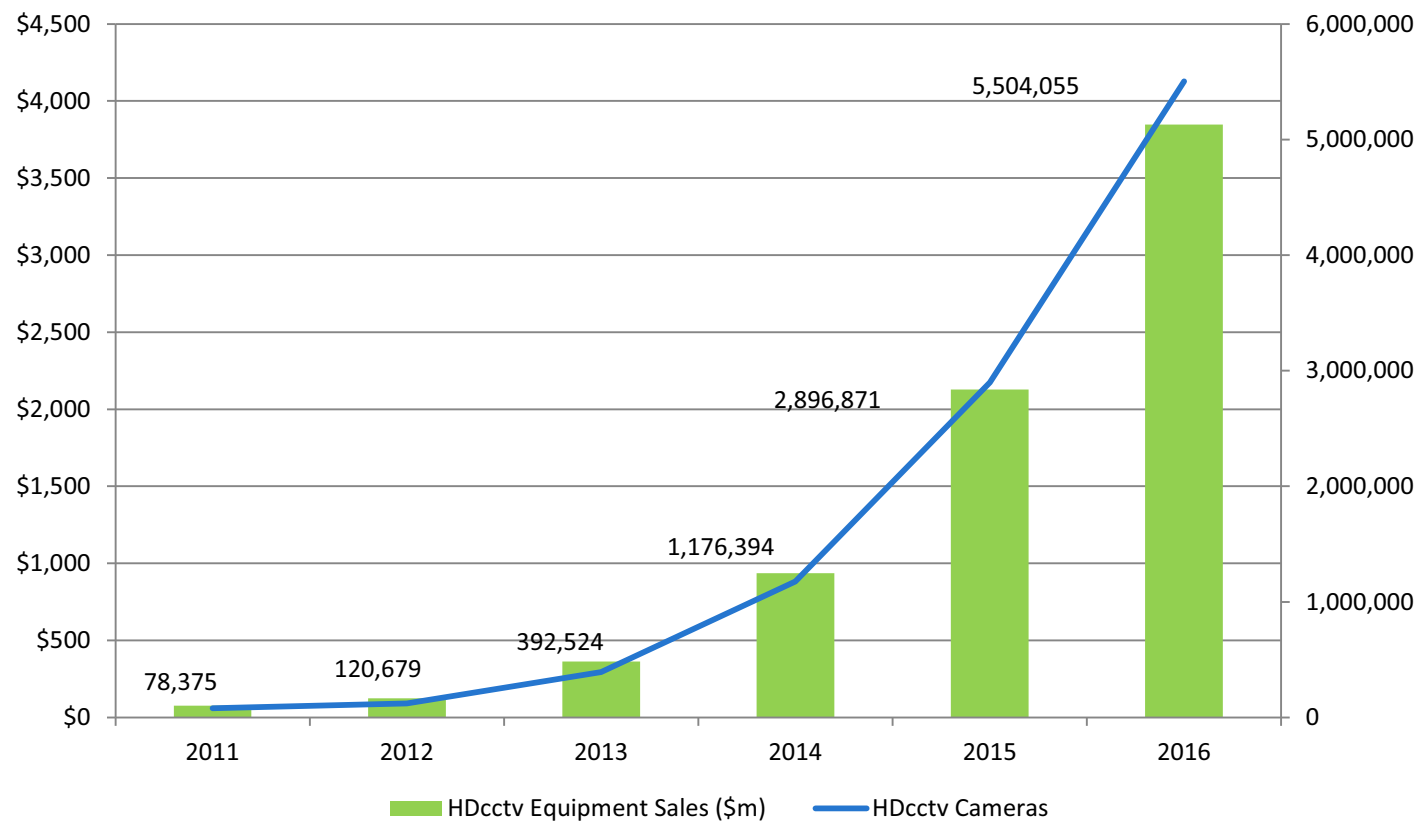

2. Market Trend

■ Camera Market Share

[resource : HDcctv alliance 2011]

■ HDcctv Market Growth

[resource : HDcctv alliance 2011]

3. The Advantages of HD-CCTV

- 1080p(1920x1080)/ 720p(1280x720) resolution
- Full HD live view and recording
- Plug-and-play on the coaxial cable
- Uncompressed image transmission, no delay
- Progressive scan

HD-SDI vs. Mega IP

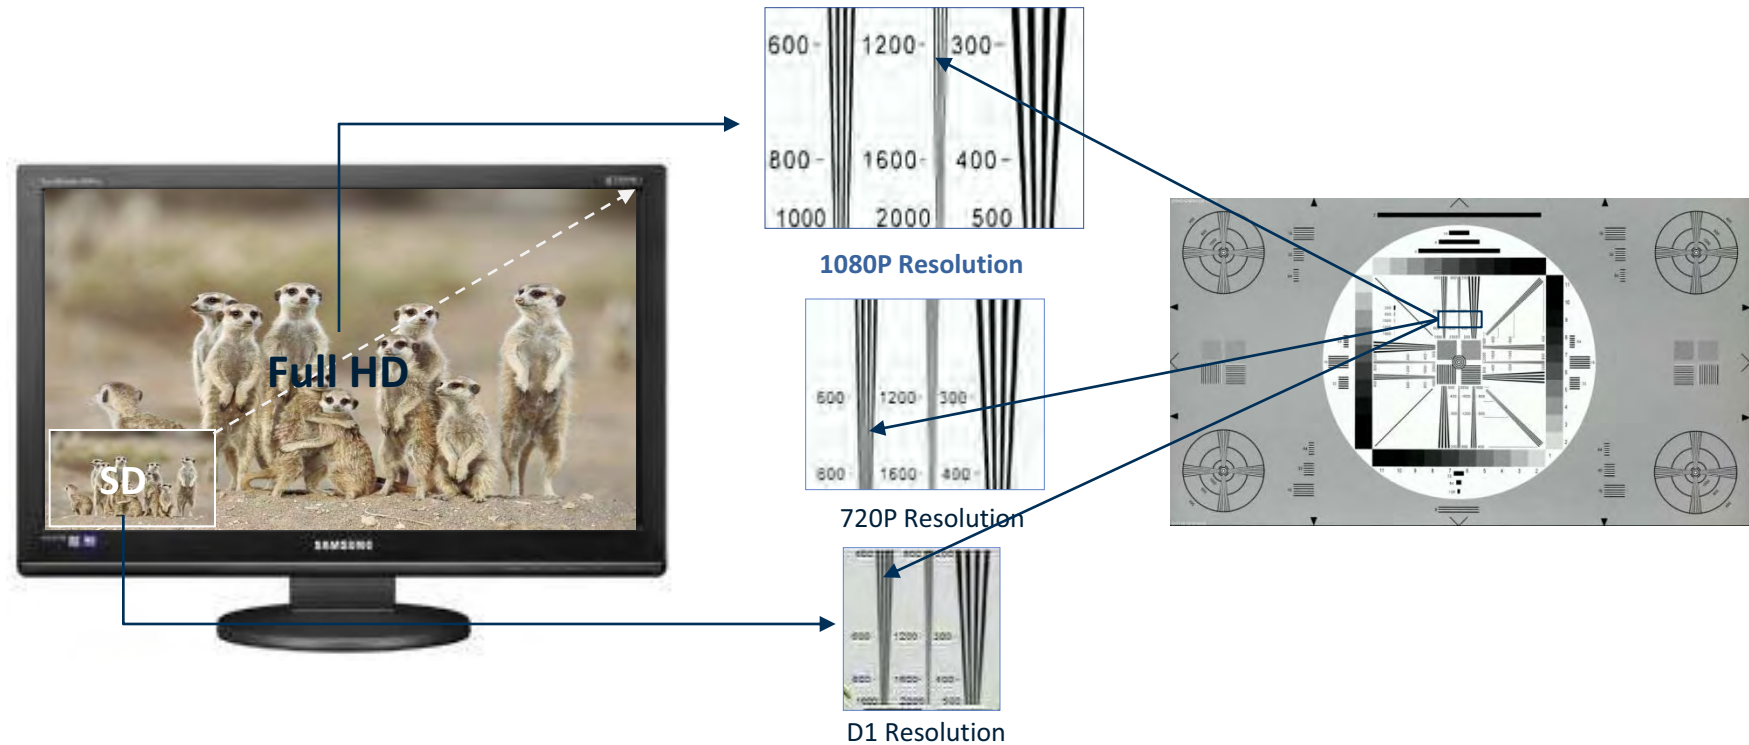

PERFORMANCE	HD-CCTV	CCTV	IP Camera
Works with Existing Coax	Yes	Yes	No
Near 0 Latency	Yes	Yes	No
Comprehensive, Global Interface Standard	Yes	Yes	No
Guaranteed 100% Plug & Play	Yes	Yes	No
100% Digital	Uncompressed	No	Compressed
Delivers 720 or 1080 Video Resolution	Uncompressed	No	Compressed
Delivers Full Frame Rate HDTV	Uncompressed	No	No
Commissioned Cost per Video Channel	Medium	Low	High
Delivers 2 Mega Pixel Video	Planned	No	Compressed

3. The Advantages of HD-CCTV

- **Full-HD Resolution**

- HD-SDI solution provides about 6 times larger than the size of SD-CCTV's.

4. HD-CCTV products

■ HD series – HD-SDI DVR

	HD400ME	HD400H	HD800H	HD1600M	PICTURE
channel	4ch		8ch	16ch	
recording	60@720p 30@1080p	120@720p 60@1080p	240@720p 120@1080p		
output	1 HDMI/1 VGA				
internal storage	2 HDD + DVD	4 HDD + DVDRW			
external storage	e-SATA				
	N/A	NVS04R(up to 64Tb)			
features	<ul style="list-style-type: none">• Multi streaming – 1080p, 720p, D1 and CIF• Dual resolution support – 1080p, 720p auto recognized• Full frame playback @ 1080p, 720p each• Smart phone connect : iPhone, Android apps.• ATM/POS recording & text search• Windows, Mac. Linux browser connect available				
	Certificate #CC20110729-1	Certificate #CC20110331-1	Certificate #CC20110728-1	N/A	

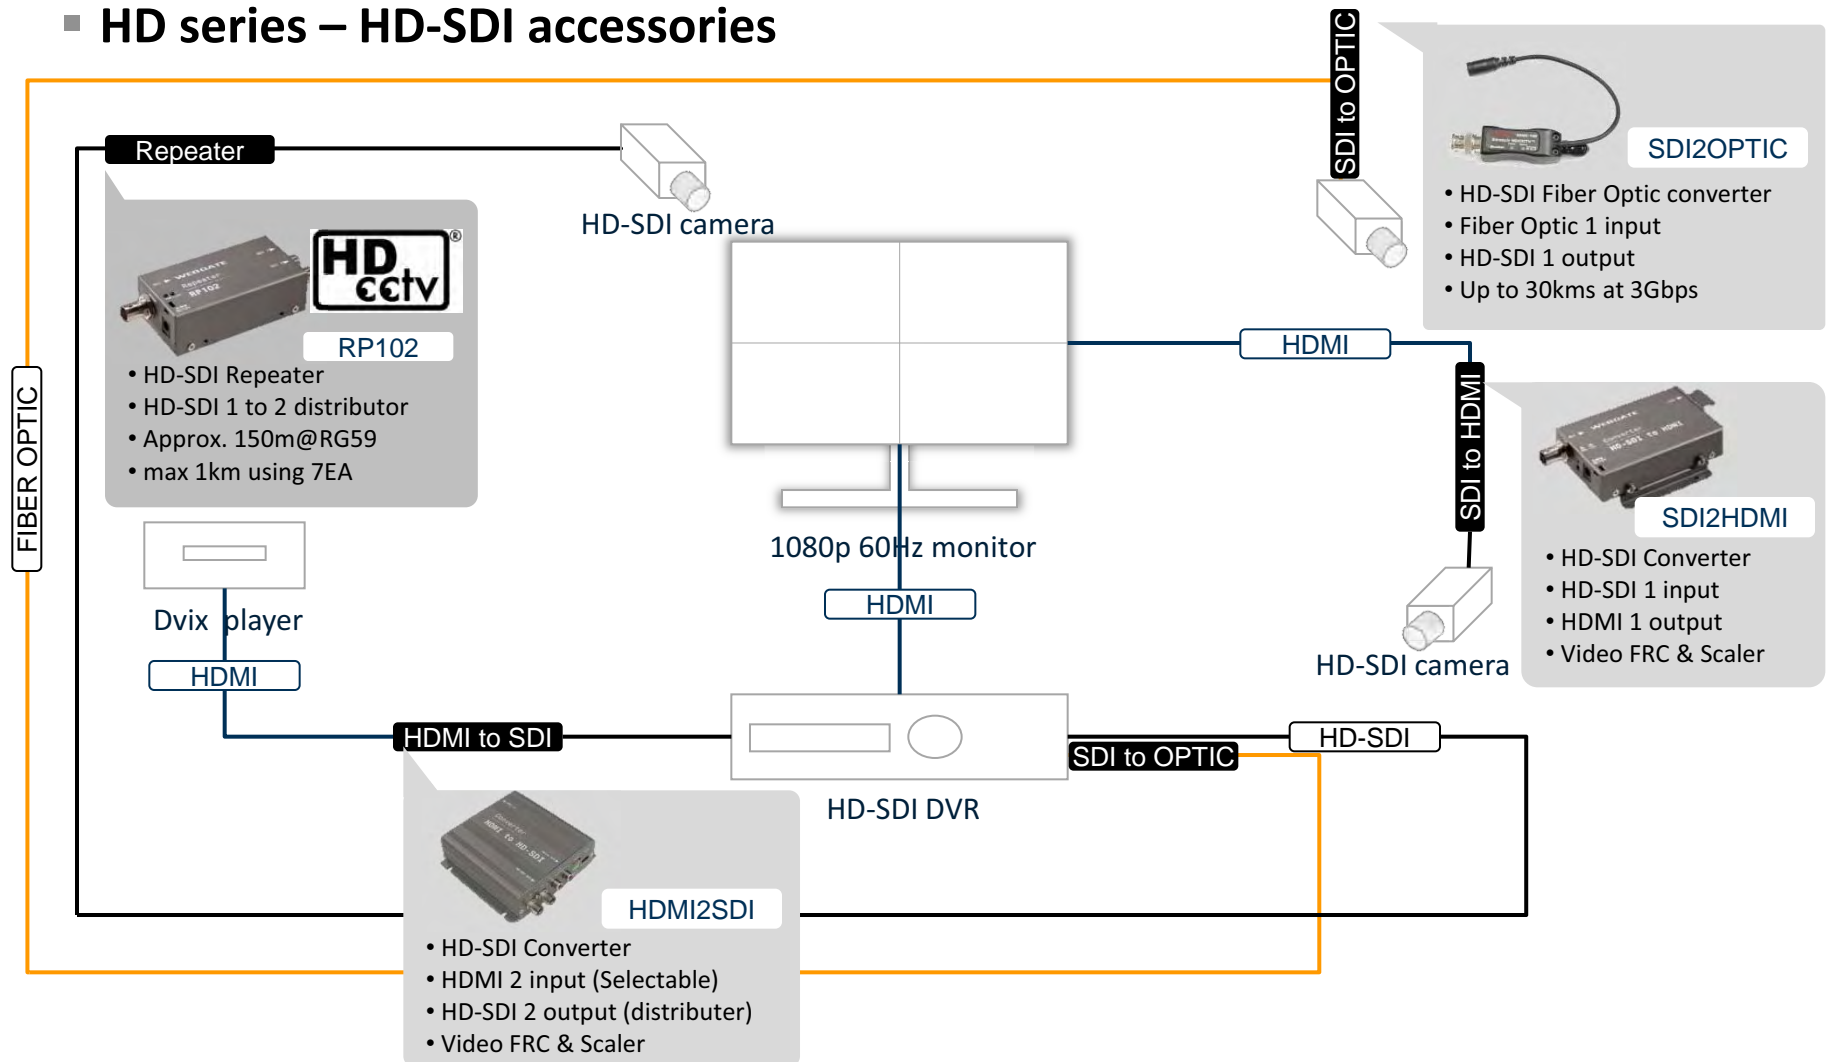

4. HD-CCTV products

■ HD series – HD-SDI camera

	C1080BM	C1080B	C1080D	C1080VD	C1080PTZ
picture					
type	Box	Box	Dome(IR)	Vandal(IR)	Speed Dome
features	<ul style="list-style-type: none">• superior resolution/ low light condition• SDI performance up to 150m over• True Day & Night		<ul style="list-style-type: none">• WDR/ lens shading• privacy zone• low power consumption : 2W (low temperature)

The right silicon for your next BIG idea

Hi3520 H.264 Codec

Hi3520 Key Feature

CPU Core

- ARM1176
- I-cache 16 KB, D-cache 16 KB
- I-TCM 2 KB
- Built-in MMU, supporting multiple open operating systems such as VxWorks, Linux, WinCE, and PalmOS
- Up to 600 MHz operating frequency

Video Encoding/Decoding

- H.264 main profile encoding/decoding
- H.264 baseline profile encoding/decoding
- JPEG/MJPEG baseline encoding/decoding

Video Encoding/Decoding Performance

- Overall performance of real-time H.264 encoding/decoding: 8-channel D1
- Optimal performance for H.264 encoding/decoding: 1280x1024@30fps

Output:

- Multiple video output interfaces
- VGA/YpPr x 1+CVBS x 2
- VGA x 2
- Supporting HD output with the maximum resolution of 1920x1080p@30fps, 1920x1080i@60fps

5. Why? – HD-SDI DVR

■ Main Features

HD(1080p) camera

- lightning protect design
- SNS(Twitter) supports
- multi Ch. POS/ATM supports
- UPnP supports
- RADIUS protocol supports
- disk mirroring

- mega storage for HD DVR
- disk mirroring

Cascade up to 64TB

1st streaming

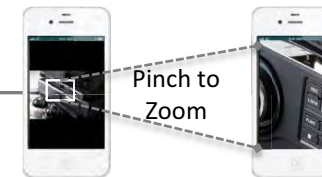

2nd streaming

3rd streaming

iPhone
Android Apps.

JAVA viewer

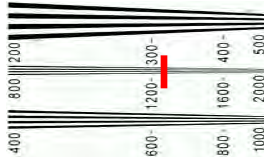

Control Center

Full SDK
(VC++, C#, Java)

5. Why? – HD-SDI camera

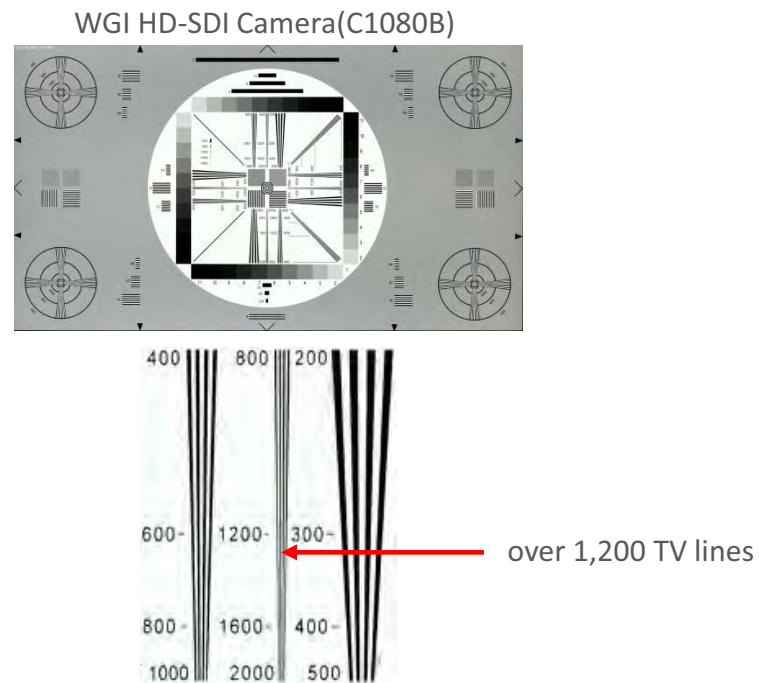

■ Comparison table

PERFORMANCE	C1080B		Competitor				
specification	HD-SDI 1080p		HD-SDI 1080p			2M pixel IP	
resolution(TV Line)	over 1,200		800	950	1,000	600	700
white balance	excellent		good	good	good	bad	middle
low lux Color(lux)	0.2		1			1	2
B/W(lux)	0.0005		0.2			0.1	0.1
company initial	WEBGATE		“S”	“C”	“W”	“L” LW	“S” VCC

5. Why? – HD-SDI camera

- **Resolution – 1080p**

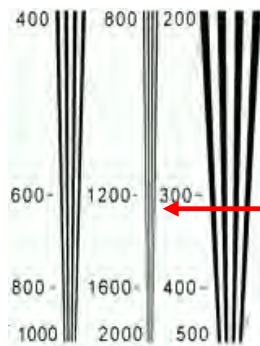

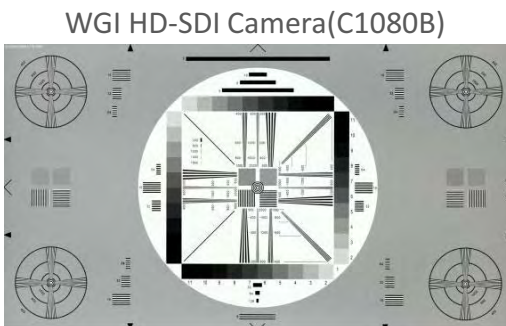

- it produces clear picture quality by supporting the better resolution than 1280 x 720p camera which having the best resolution quality in the world.

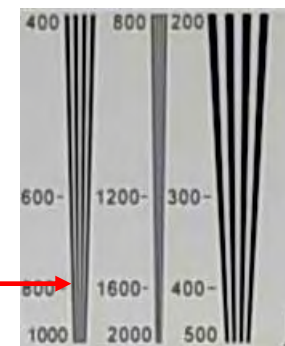

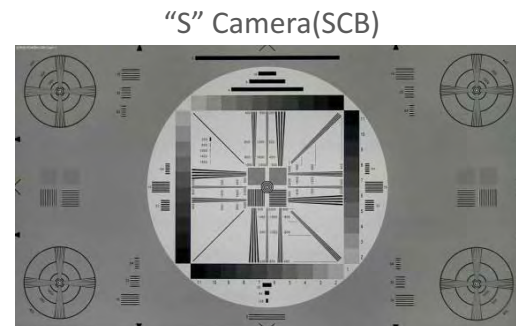

5. Why? – HD-SDI camera

■ Resolution

- it produces clear picture quality by supporting the better resolution than other 2M HD-SDI camera.

over 1,200 TV lines

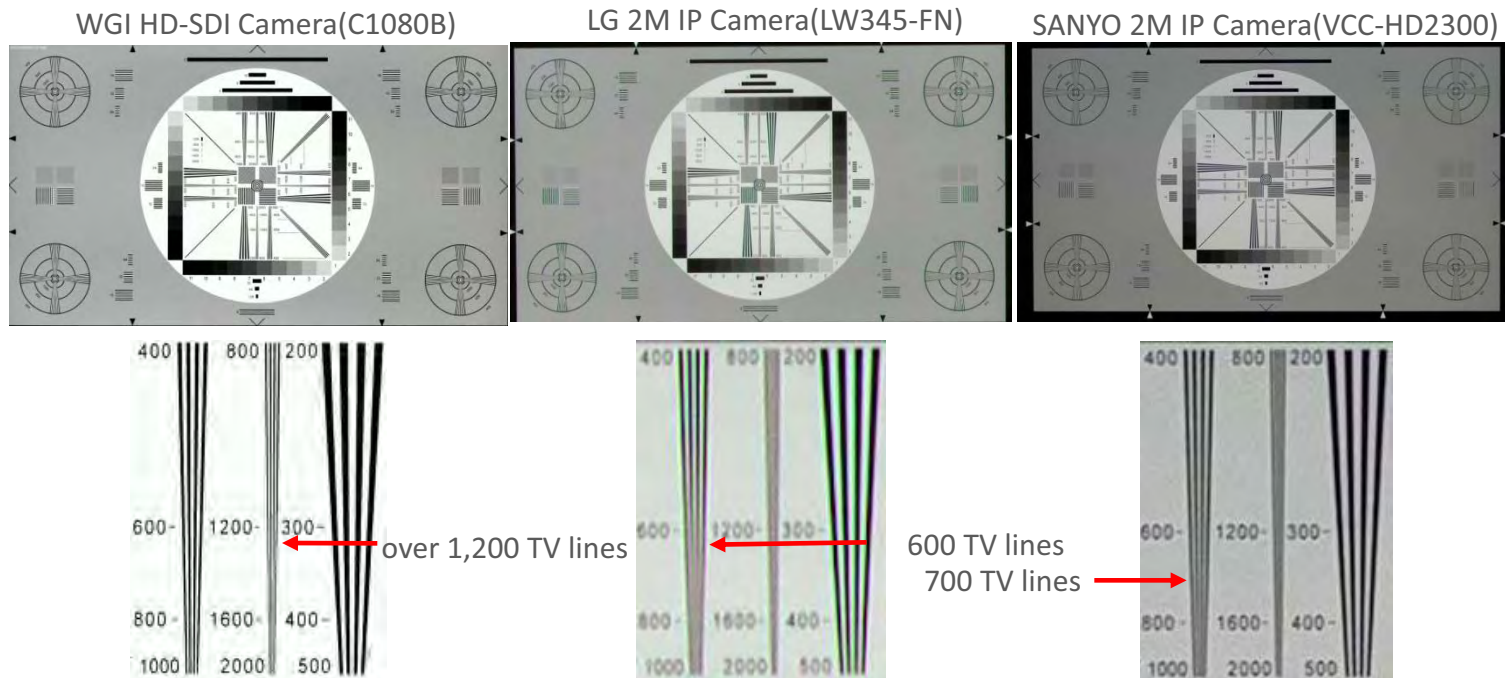

800 TV lines

5. Why? – HD-SDI camera

■ Resolution

- it produces clear picture quality by supporting the better resolution than 2M IP camera.

5. Why? – HD-SDI camera

■ White Balance

- WGI's HD-SDI camera has good white balance performance than other company's.

WGI C1080B(2M, CMOS)

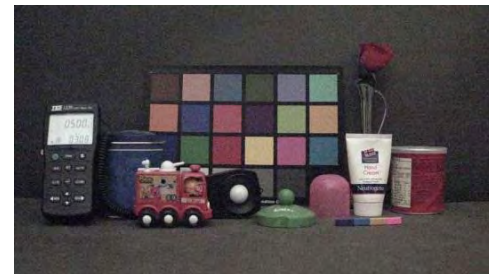

[Test environment : 5 Lux Color mode - F1.4, 3100K]

LG LW345-FN(2M, CMOS)

SANYO VCC-HD2300(2M, CMOS)

5. Why? – HD-SDI camera

- **High Sensitivity at Low light conditions**
 - B/W(0.0005Lux), Color(0.2Lux) when 50IRE, 3100K, DSS off
 - When B/W mode, very high-sensitivity through TDN function.

WGI C1080B(2M, CMOS, 0.2Lux)

“S” CAMERA (2M, CMOS, 1.0Lux)

[Test environment : 0.08 Lux color mode - F1.2, Flourescent]

WGI C1080B(2M, CMOS, 0.0005Lux)

“S”CAMERA (2M, CMOS, 0.1Lux)

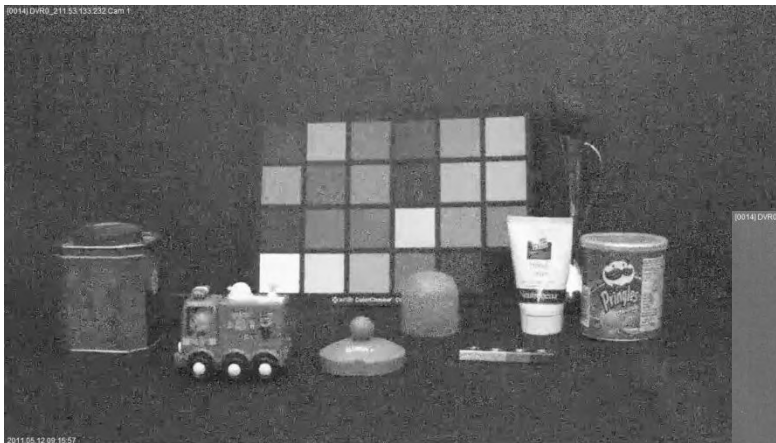

[Test environment : 0.005 Lux Color mode - F1.2, Flourescent]

5. Why? – HD-SDI camera

■ 3DNR – 3D Noise Reduction

- With 3D Noise Reduction(3DNR) embedded, it produces extremely clear picture quality even under low light condition

C1080B 3DNR OFF

C1080B 3DNR ON ✓ (high)

5. Why? – HD-SDI camera

- **WDR – Wide Dynamic Range**

- it produces clear picture quality even under back light condition when there are both very bright and dark area simultaneously.

* NOTE : WDR preforemnace may occur ghost effect while moving object of the short distance (within 5~6m)

5. Why? – HD-SDI camera

- **BLC – BackLight Compensation**

- it produces clear picture quality by increasing the exposure by a predetermined amount according to area selected in the picture.

5. Why? – HD-SDI camera

- **Smart Exposure at IR-LED**
 - it produces clear picture quality by adjusting the exposure based on area selected in the picture.

SMART EXPOSURE #1

SMART EXPOSURE

5. Why? – HD-SDI camera

- **DSS – Digital Slow Shutter(Sense-up)**
 - it produces clear picture quality by accumulate enough light to operate in conditions the human eye would perceive as complete darkness.

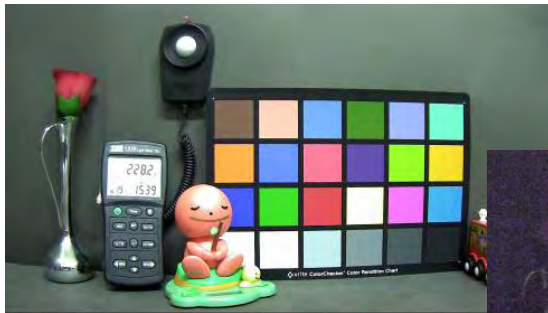

5. Why? – HD-SDI camera

■ TDN – True Day & Night

- it produces clear picture quality by removing a physical Infra-Red filter that is removed when night mode, is used when day mode.

LIGHT ON, DAY MODE(228lux)

LIGHT OFF, DAY MODE(0 lux)

LIGHT OFF, **NIGHT MODE**(0 lux)
